# Biased Data, Models, and Algorithms

## Program

|       |                                                                                                                    |
|-------|--------------------------------------------------------------------------------------------------------------------|
| 09:00 | Welcome and Introduction                                                                                           |
| 09:15 | Introduction to the Bern Data Science Initiative                                                                   |
| 09:45 | Round of Introduction                                                                                              |
| 10:15 | Keynote by Dr. Krikamol Muandet<br>Towards Collective Intelligence in Heterogeneous Learning                       |
| 11:15 | Coffee Break                                                                                                       |
| 11:30 | Workshop Part 1:<br>Show your Data (see Call for Paper)                                                            |
| 13:00 | Lunch                                                                                                              |
| 14:15 | Keynote by Dr. Anna Jobin<br>What bias? Whose bias? A multi-level perspective on data and Artificial Intelligence. |
| 15:30 | Coffee Break                                                                                                       |
| 15:45 | Workshop Part 2:<br>Open Research Data infrastructure at UNIBE<br>Needs and solutions                              |
| 17:00 | Final Discussion                                                                                                   |
|       | Apéro                                                                                                              |
